NESPRESSO COFFEE MACHINE
Citiz & Milk EN165S

EN165S

- New compact brewing unit technology
- 19 bar pressure pump
- Thermoblock heating element
- FLOW STOP: Automatic and programmable Coffee Quantity
- The sliding cup support has 2 positions, one for espresso cups and one for latte macchiato glasses
- Power saving mode setting after 30 minutes from the last coffee.9,4 W average consumption after 1h of ready mode. 0,9 W average consumption after 1h of power save mode
- Settings: 40 ml for espresso and 110 ml for long black
- On/off switch and coffee volume buttons
- Easy introduction of capsules
- Automatic ejection of used capsules
- Capsule container up to 11 used capsules
- Removable 1 liter water tank

NESPRESSO

UNIQUE CAPSULE SYSTEM

The unique extraction system involves a three phase process. The first involves inserting the capsules into the front compartment. This is then followed by the automatic perforation of the capsule by three blades within the compartment. The final phase involves high-pressure extraction producing a fantastic cup of coffee with a rich crema.

SLIDING CUP SUPPORT

The machine due to the sliding cup support has 2 positions, one for espresso cups and one for latte macchiato glasses

ENERGY SAVING

Power saving mode setting after 30 minutes from the last coffee.
9,4 W average consumption after 1h of ready mode.
0,9 W average consumption after 1h of power save mode

TECHNICAL DATA

Dimensions (wxdxh)	mm	130x372x277
Weight	Kg	3,4
Input power	W	1260
Rated voltage/Frequency	V~ Hz	220/240~ 50/60
Pump pressure	bar	19
